

AQUAMARIS®

Always there to help!

The unique characteristics of the Adriatic Sea inspired scientists to create Aqua MARIS®—the legendary product that pioneered the use of seawater for therapeutic purposes

Water for Aqua MARIS® is sourced from a biosphere reserve in Croatia. This is one of the cleanest bodies of water on the planet, certified by UNESCO and rightly considered unique for its clarity and trace element composition.

The collected seawater is transported to our own production facility, where it undergoes a series of purification and quality control steps. Aqua MARIS® is the result of a complex technological process, the primary goal of which is to preserve the trace elements in the seawater and ensure the sterility of the solution.

Today, AQUA MARIS® is a universally recognized global leader in the seawater-based products category, ranking first in sales volume¹.

- Aqua MARIS® is the best-known and most popular seawater-based brand²
- Aqua MARIS® is the product that consumers specifically ask for at pharmacies more often than any other product in the category³
- Aqua MARIS® is the nasal spray most frequently prescribed by pediatricians⁴

AQUA MARIS® is the most comprehensive line of products for the treatment and prevention of runny nose, acute respiratory viral infections (ARVI), and allergic rhinitis.

All Aqua MARIS® products are approved for use by pregnant and breastfeeding women and young children.

AQUAMARIS®

For the prevention of acute respiratory viral infections and rhinitis

AQUA MARIS® for Children (drops):

- For daily nasal hygiene for babies
- From the very first days of life

AQUA MARIS® CLASSIC (spray):

- For removing viruses and irrigating the nasal mucosa
- For local immunity support
- For children ages 1 and up and adults, including pregnant and breastfeeding women

For the prevention of rhinitis, hygiene, and regular care of a baby's nose

AQUA MARIS® for Children Nasal Aspirator is an indispensable hygiene tool for newborns and young children who cannot blow their noses yet (this skill usually develops by age 3–5). When a child has a runny nose, **AQUA MARIS®** nasal aspirator helps clear the nose of accumulated mucus; for healthy children, it removes residual fluid during daily care using **AQUA MARIS® for Children** nasal drops.

AQUA MARIS® for Children Nasal Aspirator:

- The features extra-soft, “anatomically” shaped tips specially designed for young children;
- The is designed for repeated use, provided the tips are replaced (4 tips included; an additional 10 replacement tips are available in a set);
- The is stored in a modern, convenient plastic case.

Moisturizing and restoring the nasal mucosa

AQUA MARIS® PLUS (spray):

- To relieve dryness and discomfort caused by various factors:
 - Central heating, air conditioning, and environmental pollution;
 - Medications;
 - Inflammation (atrophic rhinitis);
 - Age-related changes, etc.
- For children aged 1 year and older and adults, including pregnant and breastfeeding women
